

QUALITY POLICY

As BD Otomotiv, the basis of our Quality Policy is to ensure its sustainability by providing high technology production and service with a quality that meets the expectations of our customers who are reliable and environmentally sensitive in all markets.

In line with this goal,

- It applies the principles and rules stipulated by the Quality Management System standard in all of the production and service processes in order to present the products that comply with the determined norms to the market.
- It makes production without defect and fault in working lines and guarantees the quality assurance of the production process in case of process changes caused by product differences.

With quality targets,

- Ensuring the standardization and continuous improvement of the organization and processes,
- To spread and develop a quality culture based on the participation, creative and foresighted work of all employees,
- As a company that produces environmentally friendly vehicles and electric vehicle components, it is aimed to develop the awareness of protecting environment.

With this policy, it is aimed to ensure the quality of the activities that touch BD Automotive employees, customers, suppliers and all other stakeholders and to extend the quality in all processes.

With this policy, a general quality framework is presented to support and ensure the fulfillment of relevant standards and compliance obligations in international and national legislation.
