AC 22kW: 5h  
DC 50kW: 1.5h

4WD with individual  
wheel control using our  
proprietary in-wheel  
motor technology

# Your Defender, Reborn Electric

# BEDEO

Feels like your Defender, but better.

- Durability - You and the next generation can continue to enjoy your timeless icon.
- Reliability - Limited to no maintenance required, with all sensitive parts removed.
- Comfort - Enjoy the countryside silently, without the emissions and smell of diesel.
- Performance - Off and on road enhanced performance.

Reduce your environmental footprint with the elimination of emissions related to driving and recycling your car, and benefit from substantially reduced running cost.

## A High-performance Electric Drivetrain

Our powertrain is designed and engineered entirely in-house, using the best components and our unique in-wheel motor technology.

Four high performance, independent in-wheel motors are added to electrify your Defender, meaning:

- No oil, no gear, no axles and no dependence on original powertrain.
- 75kWh battery pack.
- Fast charge 80% of the battery in 45 minutes.
- Standard 22kW on-board charger achieves 100% in 5 hours.
- Motors operate independently, providing redundancy.

## BEDEO, a Recognized and Experienced Partner

We have more than 10 years' experience as an electrification partner for leading OEM's. Our drivetrain has proven reliability with +50 million kilometres traveled by our vehicles.

Your Defender reborn into a fun, sustainable icon that can be enjoyed for many more years. Find out more by emailing
